

Omesh Sengar

+91 9880295808 | omesh@omeshsengar.com | github.com/ByteWizard-tech

Professional Summary

Computer Science major with expertise in C, Python, and web development. Strong technical foundation in algorithms, data structures, and computer networks. Passionate about software engineering and developing scalable, efficient technological solutions.

Education

RV College Of Engineering

B Tech in Computer Science, GPA: 9.23

Bengaluru, Karnataka

Sep 2024 — Sep 2028

Projects

Fairpay (Financial Management Application) | JavaScript, HTML5, CSS3

- Implemented a JavaScript financial-tracking application that reduced transaction errors by 40% and cut reconciliation time by 50%, by engineering a responsive, secure UI and optimizing state and data-processing workflows for real-time monitoring

Financial Analytics Portal | JavaScript, React.js, Chart.js, HTML5, CSS3

- Developed a client-side dashboard that improved financial decision-making speed by 35% and reduced load times by 40% by implementing interactive data visualizations, modular UI components, and optimizing responsive architecture for desktop and mobile

Research

Two-Stage Framework for ASD Detection and Severity Quantification Using Ensemble Learning and Normative Modeling — Present

RVCE

Researcher

- Built a two-stage ML framework achieving 87.83% classification accuracy on rs-fMRI data and enabling continuous ASD severity estimation using Gaussian Process-based normative modeling

A Hybrid Multi-Scale Framework for Precision Agriculture: Integrating Multispectral Remote Sensing with Deep Learning for Automated Crop Diagnosis — Present

RVCE

Researcher

- Built an AI-driven precision agriculture system combining remote sensing and CNN models, achieving 82–96.68% accuracy across multiple crops and deploying real-time disease detection via a mobile app

Awards & Honors

Best Paper Award – ICTST 2025 (IFRRA Conference)

30th July 2025

IFRRA Conference on Trends in Science and Technology

Awarded for research paper titled “IoT-Integrated Smart Lab Environment Monitor” Presented at an international conference (India–Malaysia collaboration)

Skills

Programming Languages: TypeScript, JavaScript, Python, C

Web Technologies & Development: HTML5, CSS3, DOM Manipulation, Responsive Design

Tools & Version Control: Git, Github
